## Seminar Series

### The Good, the Bad & the Ugly (of Our Skin)

Skin is the largest organ of the body. It has been smooth, soft, shiny and spotless. Later, as time goes by, moles, red spots, sunspots, tags, wrinkles, thin hair, dry skin, spider veins and warty ugly bumps all start to show up. They are not diseases though, just annoying stuff. The maturity catches up with us. That's life; we have to deal with it. As always, we try our best to "control" these unpleasant signs of life: Lancôme, Clinique, Estée Lauder and Shiseido.... Even laser, chemical peels and Obagi. Would any of these work? Did they slow down the aging process? We'll see.

### *Speaker: Tsu-Yi Chuang, MD*

Dr. Chuang moved to California 10 years ago (2006) after served as Norins (Endowed) Professor of Dermatology at Indiana University (Indianapolis) for 9 years (1995-2004) and Medical Director of Melanoma Program(1995-2004). Currently he practiced at Healthcare Partners at Mission Hills and as Clinical Professor of Dermatology at University of Southern California. His specialty is skin cancer and clinical epidemiology and had more than 150 publications including peer reviewed papers, book chapters, and abstracts.

Dr. Chuang graduated from National Taiwan University College of Medicine (台大醫學院), trained as Chief Resident of Dermatology at NTUH (台大總醫師), Dermatology Chief Resident (University of Chicago) and Epidemiology/Dermatology Fellow (Mayo Clinic). Academia Career began at University of Wisconsin (Madison) as Assistant/Associate Professor and later Associate Professor at Wright State University (Dayton) before joining Indiana University as Professor.
